### RECEIVED DATE

Keywords: XAS, Cu K-edge, Cu L-edge S K-edge, Disulfide, Cu-S bonding

Title Running Head: X-ray Absorption Spectroscopy of [Cu<sub>2</sub>S<sub>n</sub>]<sup>2+</sup> systems

**Figure S1.** The S K-edge XAS data for **3** (-----) and the corresponding second derivative spectrum (—). The second derivative clearly shows the presence of two peaks in the pre-edge region.

**Figure S3.** Comparison of the S K-edge XAS spectrum of **1** (—), **2** (—••) and S<sub>8</sub> (---). Note that the intense low energy transition (2472.8 eV) in the S K-edge spectrum S<sub>8</sub> is separated by more than 1.5 eV relative to the pre-edge feature observed in both **1** and **2**. Thus, a fractional subtraction of the S<sub>8</sub> spectrum from the spectra of **1** and **2** was performed. DFT calculation indicate that there is no other low-lying orbital containing significant amount of S character which can contribute to the S K-edge spectrum of **1** and **2** in the 2472-2476 eV region. This allows for the quantitative subtraction of the S<sub>8</sub> spectrum from that of **1** and **2**.

**Table S1.** Cu character in the  $\psi_{LUMO}^*$  obtained from *EDG\_FIT* and the total orbital covalency (TOC) method.

|  | <i>EDG_FIT</i> <sup>c,d</sup> | Total Area | TOC Method<br>Covalency <sup>e</sup> |
|--|-------------------------------|------------|--------------------------------------|
| D <sub>4h</sub> [CuCl <sub>4</sub> ] <sup>2-</sup> | 61.0%                         | 10.1       | 61%                                  |
| <b>1</b>   | 63.2%                         | 10.3       | 62.2%                                |
| <b>2</b>   | 37.4%                         | 6.4        | 38.7%                                |
| <b>3</b>   | 22.3%                         | 7.9        | 23.9%                                |

<sup>c</sup>Error in total intensity due to data processing and fitting is  $\pm 5\%$ . <sup>d</sup>Error in estimation of total intensity is 8% (see Experimental Section). <sup>e</sup>Error in estimation of total intensity is 8-10%.

**Table S2.** First shell bond distances and bond angles for **1**, **2** and **3**.

|          | Cu-S | Cu-N <sub>eq</sub> | Cu-N <sub>ax</sub> (O <sub>ax</sub> ) | SCuS (°) | SCuN (°) | Cu-D (Å) |
|----------|------|--------------------|---------------------------------------|----------|----------|----------|
| <b>1</b> | 2.28 | 2.08 <sup>b</sup>  | 2.09                                  | -        | -        | -        |
| <b>2</b> | 2.26 | 2.02               | 2.22                                  | 54.5     | 104      | 0.3      |
| <b>3</b> | 2.27 | 2.04               | 2.30                                  | 74       | 98       | 0.17     |

<sup>a</sup>The distance between the SSNN plane (D) and the Cu atom. <sup>b</sup>The average Cu-N bond distance

The geometry-optimized xyz coordinates of **1**, **2**, **3** and **3<sup>Red</sup>**.

**1** [ $\{(\text{TMPA})\text{Cu}\}_2\text{S}_2$ ]<sup>2+</sup>
