

Supplemental Figure 3. Transgene expression in GFP-tagged lines. Transcripts of the transgenes in GFP tagging lines were determined by RNA gel blot analysis. The RNA loading was monitored by determining the expression of rice ubiquitin gene 1 (*Ubi*). Ni, Nipponbare; GFP, L8 of $P_{Ubi}:GFP:T_{Nos}$; N57-GFP, L12 of $P_{Ubi}:N57-GFP:T_{Nos}$; N57G-GFP, L5 of $P_{Ubi}:N57G-GFP:T_{Nos}$; N57K-GFP, L3 of $P_{Ubi}:N57K-GFP:T_{Nos}$; N37-GFP, L2 of $P_{Ubi}:N37-GFP:T_{Nos}$.
