

## SUPPLEMENTAL FIGURE LEGEND

**Fig. 1.** Risk ratio (RR) of CHD for participants with various combinations of sTM and fibrinogen tertiles vs. upper tertile sTM/lower tertile fibrinogen as the reference group. Besides adjusting for age, sex, race, and cardiovascular risk factors, adjustment was made for BMI. *p* values refer to comparison with the reference group.

**Fig. 2.** Risk ratio (RR) of CHD for participants with various combinations of sTM and fibrinogen tertiles vs. upper tertile sTM/lower tertile fibrinogen as the reference group. Besides adjusting for age, sex, race, and cardiovascular risk factors, adjustment was made for CRP. *p* values refer to comparison with the reference group.
