Supplemental Figure 4. NAb responses by IC80 prior to superinfection.
 (a) IC80 values for plasma/virus combinations are presented as described in the legend to Figure 2a. (b) Comparison of breadth scores calculated using IC80 values between superinfection cases and matched controls prior to superinfection, as for Figure 2b. (c) Comparison of potency scores calculated using IC80 values between superinfection cases and matched controls prior to superinfection, as for Figure 2c.
