

## Supplementary tables

<b>Strain</b>	<b>Generation</b>	<b>Subpopulation</b>
M1	56	Green
M2	91	Red
M3	196	Yellow
M4	256	Red
M5	385	Yellow

### **Supplementary Table 1. Description of the adaptive clones analyzed.**

The adaptive clones were isolated at the generations and from the subpopulations specified. See Figure 1A in paper for population structure and details of isolation.
