

Supplemental Figure 1

Supplemental Figure 1 Increase in liver pro-IL-1 β mRNA but not serum IL-1 β from NALP-3 $^{-/-}$ mice treated with APAP. (A) Treatment of NALP-3 $^{+/+}$ and NALP-3 $^{-/-}$ mice with APAP results in an increase in total liver mRNA for pro-IL-1 β (* P<0.04 and ** P<0.04). (B) Treatment of NALP-3 $^{+/+}$ but not NALP-3 $^{-/-}$ mice with APAP results in an increase in serum IL-1 β (* P<0.01 and ** P:NS).
