

PCR product amplified using primers VacAF/KanR and ligated into pGEM-T-EZ

PCR product amplified using primers VacAR and either 0, 5, 15, 50, or 100, depending on desired size of identical repeat, and ligated into pGEM-T-EZ

Digestion with BglII/SphI, then ligated with pATR2

Digestion with KpnI/SpeI

Digestion with KpnI/SpeI
