

Supplemental Tables 5-8:

Haplotype tables using a 2, 4, 5, or 6 SNP sliding window. Black highlights represent haplotypes that are significantly associated with AD, while gray highlights represent haplotypes that are protective. As was evident with the 3 SNP window analyses (see main text and Table 4) there was a general clustering of significant results near SNPs 8-10 at the 5' end in the Caribbean Hispanics, and near SNPs 22-25 at the 3' end in the North Europeans and MIRAGE African American cohorts.

Supplemental Table 5
