n, number of individuals; FPG, fasting plasma glucose; 2-h PG, 2-hour plasma glucose; FPI, fasting plasma insulin; 2-h PI, 2-hour plasma insulin; TC, plasma total cholesterol; TG, plasma triglycerides; HDLC, plasma HDL cholesterol; HOMA-R, Homeostasis model assessment of insulin resistance

Values are median (Inter Quartile Range) for FPG, 2-h PG, FPI and 2-h PI; mean (SD) for TC, TG, HDLC and HOMA-R; p by ANOVA; p1, adjusted for age and gender; p2, adjusted for age, gender and BMI
