

Supplemental Data Table S6. Effects of norepinephrine (NE), dibutyryl cyclic AMP (DBcAMP) or Forskolin on transcript abundance in cultured pineal glands. This is an expanded version of Table 6. Glands were cultured for 48 hours prior to the initiation of the indicated treatment. Treatment duration was 6 hours. Transcript abundance was measured by qRT-PCR and normalized as described in the Experimental Procedures. Each value is based on results obtained from 3 pools of 3 glands and given as the mean \pm SE and as a treatment/control ratio. * p<0.01; # , genes used for normalization.

Gene Symbol	Control (Copies)	NE (Copies)	NE Control	DBcAMP (Copies)	DBcAMP Control	Forskolin (copies)	Forskolin Control
