* -/- = negative for both assays; +/+ = positive for both assays; +/- = positive for PGMY09/11 and negative for SPF₁₀; -/+ = negative for PGMY09/11 and positive for SPF₁₀. Percent disagreement calculated as 100 times the sum of +/- and -/+ divided by sum of -/-, +/+, +/- and -/+. 68/73 = HPV68 or HPV73.

†All of the specimens tested positive for HPV by PGMY09/11, but only HPV types in common to PGMY09/11 and SPF₁₀ are shown.

Supplementary Table 2. Comparison of human papillomavirus (HPV) type frequency between PGMY09/11 and SPF₁₀ for 282 invasive cancer specimens*
