

**List of affected genes, confidential preview.**

Statistics are testing for differential expression (two-sided non-null).

Ranks refer to this test.

Results are grouped by

Differentially expressed with  $q < 5\%$   $M > 0$

Differentially expressed with  $q < 5\%$   $M < 0$

Non-differentially expressed,  $q$  of 5% or higher

Up-regulation

Down-regulation

Insignificant

Orthogonal contrasts examined:

15 dpi Syncytium vs 5 dpi Syncytium

374	AT1G42990.1   Symbol: ATBZIP60   AtbZIP60 consists of a bZIP DNA binding domain followed by a putative transmembrane domain. GFP fusions containing the first 260 amino acids (AtbZIP60deltaC) are nuclear-localized. AtbZIP60 is upregulated by the addition of tunicamycin (ER stress response inducer), DTT (inhibitor of disulfide bond formation) and azetin-2-carboxylate (proline analog perturbing protein structure). It is hypothesized that upon ER stress the protein is proteolyzed and the soluble part translocated into the nucleus. AtbZIP60deltaC can activate the promoters of the ER chaperones BiP1, BiP2 and BiP3 and CNX1 and CNX2 via binding to the ER stress response element (ERSE) and the plant unfolded protein response element(P-UPRE). It can also activate its own transcription.   chr1:16138292-16139903 REVERSE   Aliases: ATBZIP60, F13A11.5, F13A11_5	9.1	7.9	1.2	4.1	37.1%	-0.2

6506	AT3G55360.1   Symbol: CER10/ECR   Enoyl-CoA reductase (ECA) is involved in all very long chain fatty acids (VLCFA) elongation reactions that are required for cuticular wax, storage lipid and sphingolipid metabolism. The protein is located in the ER, but in contrast to its yeast homolog TSC13 is not particularly enriched in the nuclear envelope-vacuole junction. Mutants in this gene show abnormal organ morphology and stem glossiness. Cells in all tissues are only about 1/3 of the size of wild type cells. The morphological changes are most likely to result from the reduction in the VLCFA content of sphingolipids. Mutants also show abnormalities in the endocytic membrane organization and transport.   chr3:20531907-20533963 REVERSE   Aliases: CER10, ECR, T22E16.20	4.4	5.0	-0.6	-1.1	100.0%	-4.2
