

**Raw data effect of Compound 1 on the recruitment of white blood cells  
Peritoneal lavage (2\*5ml PBS/EDTA) 48h after the injection of Thioglycolate**

Data were averaged for the six animals in each group, and expressed as % inhibition as compared to recruitment seen by thioglycolate (Thioglycolate/Control) over background (Water/none).

Irritant (thioglycolate/treatment)	Dose (mg/kg)	Route	Animal ID	Body weight g	Counts 10 <sup>3</sup> /μl	Neutrophils		Lymphocytes		Mono/macrophages
