

**Resolution of allergic inflammation and AHR is
dependent upon disruption of the T1/ST2-IL-33 pathway**

Jennifer Kearley*, Karen F Buckland* Sara A Mathie and Clare M. Lloyd

Online Data Supplement

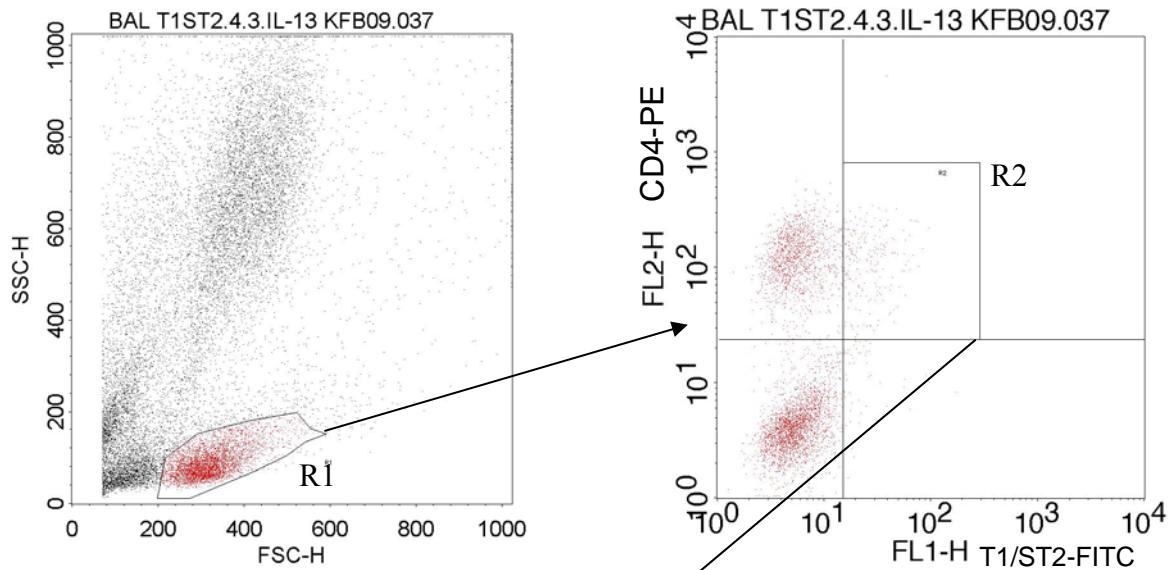

Online data supplement Figure E1

Cells contained within a low FSC/SSC lymphocyte gate were plotted on a dot plot of FL-1 (FITC T1/ST2) versus FL-2 (PE CD4) and double positive cells gated as shown. The total number of double positive cells in the BAL or lung tissue was calculated as shown.

Online data supplement Table E1

Cells were quantified by differential counting of stained cytospins and data is plotted as mean \pm s.e.m; n = 4-9 mice per group.

Supplementary Figure E1

Region	Events	% Gated	% Total
R1	4532	100.00	23.81
R2	218	4.81	1.15

BAL calculation:

$$\text{Total BAL cells} \times \frac{(\% \text{ of total cells})}{100} \times \text{BAL volume} = \text{CD4+T1ST2+} \\ (\text{cells/ml}) \quad (\text{ml}) \quad (\text{cells/ml})$$

Lung calculation:

$$\text{Total lung cells} \times \frac{\text{R2}}{\frac{(\% \text{ of total cells})}{100}} = \text{CD4+T1ST2+} \\ (\text{cells/mg}) \quad (\text{cells/mg})$$

A. BAL
