EC387567.1	3%	3.00E-84	95%	winged adult

* This search was carried out using nucleotide blast with the *Myzus persicae* densovirus (MpDENV) genome sequence (Gene Bank Accession Number: NC_005040) as a query sequence in Aphidinae expressed sequence tags (EST) database (133076 entries in total). All matches were found only in ESTs from *Myzus persicae*, parthenogenetic females. Only sequences producing significant alignments are shown.
