

Figure S5 - PPIL4-like Cyps

Domain architecture and genomic organization of *ChCyp*34.5, the only apicomplexan PPIL4-like Cyp which contains an RNA recognition motif. Species are abbreviated as in Fig. 1. Cyp, Cyp superfamily domain (CD accession-no.: [cl00197]); NLS, nuclear localization signal; RRM, RNA recognition motif (CD accession-no.: cd00590).
