N2		$16.7 \pm 0.1$	70/113		
<i>daf-2(e1368)</i>	2	$26.6 \pm 0.7$	91/132		
<i>tcer-1(tm1452); daf-2(e1368)</i>		$23.3 \pm 0.5$	75/136	87.5	0.2

LS: Lifespan; SEM: Standard error of the mean.

<sup>a</sup> Some animals were censored as described in Materials and Methods.

<sup>b</sup> Control refers to worms exposed to empty vector plasmid without an RNAi insert (in RNAi experiments).

\* , \*\* , #,## Experiments depicted in Figures 6A, B, F and G, respectively.
