

**Table S5:** Species composition of *An. gambiae* complex for the ITT-B, HLC and SRB and the influence of each trap upon the proportion of *An. gambiae s.s.* sampled, as determined by binary logistic regression

Trap type	<i>An. gambiae s.s.</i>		
	Proportion	Odds [95% CI]	P
ITT-B	0.54 [n=110]	0.52 [0.23, 1.17]	0.115
SRB	0.48 [n=26]	1.80 [0.21, 15.12]	0.588
HLC	0.61 [n=132]	1.00 <sup>a</sup>	NA

<sup>a</sup>=Reference trap

n=Total number of mosquitoes

CI=Confidence interval

NA=Not applicable
