

Supplementary Figure 2. Pearson correlation of genes in the thyroid-responsive gene set with *PPARGC1A* and *LEPR* expression

- | | |
|----------------------------------|--------------------------------|
| 1 Transcriptional control (n=52) | 8 Glucose metabolism (n=13) |
| 2 Signal transduction (n=67) | 9 ESTs (n=47) |
| 3 RNA metabolism (n=35) | 10 Energy metabolism (n=30) |
| 4 Protein translation (n=26) | 11 Cytoskeleton protein (n=32) |
| 5 Protein catabolism (n=33) | 12 Cellular trafficking (n=24) |
| 6 Miscellaneous (n=61) | 13 Cellular immunity (n=10) |
| 7 Lipid metabolism (n=1) | |

- p>0.05 Obese / Lean
- ✚ p<0.05 Obese / Lean
- Obese / Lean
- Mean R in each functional category

** p<0.01, *** p<0.001 for mean of Pearson correlation deviating from 0 in each functional category
