

Supplemental Figure 1: Longitudinal growth is intact in CD47^{-/-} mice

A. Isolated WT (n=8) and CD47^{-/-} (n=8) femur length was measured by calipers. p= 0.52

B. Whole body length of WT (n=4) and CD47^{-/-} (n=4) mice was measured by calipers.

p= 0.55

Supplemental Figure 2: Absolute tumor volume in bone is decreased in CD47^{-/-}

mice

A. Tumor volume from Figure 5E is shown as absolute tumor volume. p= 0.04

B. Tumor volume from Figure 6D is shown as absolute tumor volume. p= 0.04
