

Supplemental Figure 7

Supplemental Figure 7. Effect of extracellular Ca²⁺ on DA SMC migration

DA SMC migration was increased in accordance with the concentration of an extracellular Ca²⁺. The values are expressed as means±SEM. n=6, † indicates $p < 0.05$ versus Ca²⁺ concentration 0.25mM not containing FCS. * and ** indicate $p < 0.05$ and $p < 0.01$ versus Ca²⁺ concentration 0.25mM containing 10%FCS, respectively. FCS: fetal calf serum.
