

Supplemental Data. Swaminathan et al. (2009). CYP76M7 is an *ent*-cassadiene C11-hydroxylase defining a second multifunctional diterpenoid biosynthetic gene cluster in rice.

Supplemental Figure 1: Production of C11-keto-*ent*-cassadiene by CYP76M7 in vitro. A) GC-MS chromatograph of assay extract (**1**, *ent*-cassadiene; **3**, C11-keto-*ent*-cassadiene). B) Mass spectra for **3** (C11-keto-*ent*-cassadiene).

Supplemental Figure 2: Production of C11-keto-*ent*-cassadiene from C11 α -hydroxyl-*ent*-cassadiene by recombinant bacteria expressing CYP76M7 and Os-CPR1. A) GC-MS chromatograph of fed culture extract (2**, C11 α -hydroxyl-*ent*-cassadiene; **3**, C11-keto-*ent*-cassadiene). B) Mass spectra for **3** (C11-keto-*ent*-cassadiene).**

Supplemental Figure 3: Alignments used to generate the phylogenetic trees in Figure 6. A) Alignment of CPS used for phylogenetic tree in Figure 6A. B) Alignment of KSL used for phylogenetic tree in Figure 6B. C) Alignment of CYP used for phylogenetic tree in Figure 6C.
