ATTEMPT IN CLASSIFICATION OF THE CATALASE-POSITIVE STAPHYLOCOCCI AND MICROCOCCI

D. A. A. MOSSEL

*Laboratory of Bacteriology, Central Institute for Nutrition and Food Research T.N.O.,
Utrecht, The Netherlands*

Volume 84, no. 6, page 1140, title should read: "Attempt in classification of the catalase-positive cocci: staphylococci and micrococci." Col. 1, lines 3 and 4 should read "Netherlands). Attempt in classification of the catalase-positive cocci: staphylococci and micrococci." Col. 1, lines 22 and 23 should read "3%. Of 105 obligately aerobic coagulase-negative cocci (micrococci), none fermented man-." Page 1143, col. 2, line 31 should read "this may be, our results clearly demonstrate that-."

EFFECTS OF URACIL AND THYMIDINE ON THE DEVELOPMENT OF RESISTANCE TO 5-FLUOROURACIL IN *PEDIOCOCCUS CEREVISIAE*

P. J. WHITE AND C. A. NICHOL

Department of Experimental Therapeutics, Roswell Park Memorial Institute, Buffalo, New York

Volume 85, no. 1, page 97, Abstract, lines 11-12 should read "Addition of thymidine alone decreased sensitivity to FUDR 500-fold."

PROTOPLAST MEMBRANE OF *STREPTOCOCCUS FAECALIS*

GERALD D. SHOCKMAN, JOSEPH J. KOLB, BOHDAN BAKAY,
MARGARET J. CONOVER, AND GERRIT TOENNIES

*Department of Microbiology, Temple University School of Medicine, and The Institute for Cancer Research,
Philadelphia, Pennsylvania*

Volume 85, no. 1, page 175, Acknowledgments, lines 6 and 7 should read "The electron micrographs were prepared and taken by T. F. Anderson."
