

Supplemental Figure 3. Hydropathy plots for yeast and human Class I PAQRs. (A-D) Hydropathy plots for various individual proteins from different groups were generated and aligned (dotted lines). An average hydropathy plot for all members of each group were generated (solid lines). **(A)** Fungal Izh2p-like proteins. **(B)** Vertebrate AdipoR1/2-like proteins. **(C)** Vertebrate PAQR3-like proteins. **(D)** Vertebrate PAQR4-like proteins. **(E)** A topological model for all PAQRs with the positions of the three conserved motifs.
