

Supplemental Figure 2

Supplemental figure 2. Way-169916 fails to induce AHR-dependent gene expression in MCF-7 cells.

MCF-7 cells were treated with either vehicle (DMSO), 10 nM TCDD or 10 μ M Way-169916 as indicated for 4 h. Total RNA was isolated, reverse transcribed to cDNA and used as a template for quantitative RT-PCR analysis of human (A) *CYP1A1* and (B) *CYP1A2* expression. Data represent mean *CYP1A1* *CYP1A2* mRNA \pm SEM level normalized against human *rL13A* mRNA.
