

Additional data 1 : Mass Spectrometry identification of the Ku proteins interacting with AP-2 α

Accession number *	Protein name	Mass [†]	Peptides matched [‡]	Total score [§]
P13010	ATP-dependent DNA helicase II, 80 kDa subunit	83091	13	499
P12956	ATP-dependent DNA helicase II, 70 kDa subunit	69953	7	209

* Accession numbers of the identified proteins in the UniProtKB/Swiss-Prot data base.

[†] Predicted molecular masses of identified proteins.

[‡] Numbers of peptides identified from the amino acid sequences of assigned proteins.

[§] Total probability scores from the Mascot search for identified proteins. Scores were >39 (limit).
