

## Supplementary Tables:

Supplementary table: Association of continuous-combined EPT use (progestin  $\geq$  25 days/month) and endometrial cancer (based on baseline questionnaire data)

HT Type	Duration (Years)	N Ca (Co)	OR (95% CI)*	P Value
<b>Never</b>		55 (148043)	1 (Ref)	
<b>Continuous-Combined</b>	< 5	12 (26941)	1.67 (0.85-3.28)	
	5-9	15 (36656)	1.58 (0.84-2.94)	
	10-14	6 (30004)	0.82 (0.34-1.99)	
	15+	10 (15163)	2.80 (1.38-5.70)	
	Per 5 years		1.31 (1.07-1.61)	0.0096
			P trend	0.085

\* Adjusted for age, race, reference year, menopause age, number of full-term pregnancies, age at the last full-term pregnancy, lifetime oral contraceptive use duration and body mass index  
Abbreviations: EPT: Estrogen-Progestin Therapy; OR: Odds Ratio; CI: Confidence Interval; Ca: Case; Co: Control; Ref: Reference Group; HT: Hormone Therapy; CTS: California Teachers Study
