

**Correction.** In the article "Complete tracking of transient proton flow through active chloroplast ATP synthase" by Wolfgang Junge, which appeared in number 20, October 1987, of *Proc. Natl. Acad. Sci. USA* (84, 7084–7088), the author requests that the following correction be noted. In the right column, line 33, on p. 7088, ref. 6 should read as follows: Kell, D. B. (1979) *Biochim. Biophys. Acta* 549, 55–99. J. F. Nagle and H. J. Morowitz, who were erroneously cited, have not advocated the confinement of the lateral proton flow in bioenergetic coupling membranes to the membrane/water interface.
