

Supplementary Figure 2 Topology interpretation of AcMNPV polyhedrin structure.

(A) The secondary structure was analyzed and assigned by dssp (Kabsch & Sander, 1983) and shown as arrows for strands and cylinder for helices. The disordered regions D1 and D2 are drawn as dashed lines. (B) shows sheet BIDG expanded by strands βA , A' and A'' and βJ from two other subunits which are distinguished by colors.
