

Recurrent mutations of the STAT6 DNA binding domain in Primary Mediastinal B-cell Lymphoma. Ritz *et al*

Supplementary Figure. Mutation in the DNA binding domain of STAT6 in L1236 Hodgkin lymphoma cell line

Electropherograms showing partial *STAT6* cDNA sequences for L428 (upper panel, wild type sequence) and L1236 (lower panel, mutation N471Y and polymorphism D419N) Hodgkin cell lines.

Supplementary Figure
