

SUPPLEMENTARY DATA

(A, B) Midday leaf water potential (Ψ_{leaf}), (C, D) net leaf photosynthesis (A), (E, F) stomatal conductance (g_{ST}) and (G, H) instantaneous water use efficiency (A/g_{ST}) of well-watered C_3 and C_4 Panicoid grasses. Data are presented for individual C_3 and C_4 species that were maintained with SWC above 16 % for a 75-d period. Values are means \pm s.e. and $n > 5$ for each species.
