Significantly over-represented functional gene ontology (GO) categories of up-regulated genes associated with t(8;21) are presented here. GO categories that are also over-represented in down-regulated genes associated with t(8;21) are not included. Corrected p-value is the Bonferroni multiple hypothesis. Identification tags that are both up-regulated and down-regulated are not included in the 'other tags' columns. Identification tag descriptions can be found in Table S1.
