cof1_::Kan^RMX6 strains were derived from the COF1/cof1_ strain of the *Saccharomyces* Genome Deletion Project (www.sequence.stanford.edu/group/yeast_deletion_project/deletions3.html).

Other cof1 alleles were generated by crosses from strains provided by David Drubin

(Lappalainen et al., 1997). cof1_::URA3MX4 and all other strains were generated in this lab.
