

Supplemental Figure 2

Supplemental Figure 2. Comparison of the mobility of in vitro translated [^{35}S]pre-atTic40-APG1TM, [^{35}S]int-atTic40-APG1TM, and [^{35}S]atTic40-APG1TM with that of the product generated by importing [^{35}S]pre-atTic40-APG1TM into isolated chloroplasts. The mobility of in vitro translated [^{35}S]int-atTic40-APG1TM is similar to the int-atTic40-APG1TM import product.
