

Supplementary Table. Comparisons of human biopsy sample microarray transcript measurements with cell culture quantitative RT-PCR and microarray transcript measurement. Ten highest IFN- β 10U/ml inducible transcripts from cell culture RT-PCR experiments listed.

Transcript	DM Biopsy Samples	Other- IM Biopsy Samples	Cell Culture IFN- β 10U		Cell Culture IFN- α 10U		Cell Culture IFN- β 1U		Cell Culture IFN- α 1U
