

Additional File 5: Specimen list

Specimens included in the analyses by lake of origin, species, specimen number, lip morph (L = thick-lipped, N = thin-lipped; only relevant for Apoyeque), and sex/maturity (F = adult female, M = adult male, J = juvenile, not noted = not noted or unassignable; only relevant for Apoyeque). Ecological and morphological analyses include: stable isotope analyses (SIA), diet or gut contents (gut), head width, lip and body size, and geometric morphometric analyses of body shape and pharyngeal jaw shape. Genetic data include mtDNA Genbank accession numbers, and whether the specimen was genotyped for microsatellite loci (x = genotyped).

Lake	Species	sample ID	lip	sex/ maturity	SIA	diet	width	shape	shape	lip & body size	Genbank	Genotype
