

FIGURE LEGENDS

Supplemental Fig. 1. rNHERF-1 co-precipitated with Flag-rMrp2 in co-transfected HEK293 cells. Cell lysates were incubated with anti-Flag M2 agarose beads and the Co-IP complex was immunoblotted with anti-NHERF-1 antibody AB5487. Note that NHERF-1 was detected only in the Co-IP complex from cells co-transfected with plasmids expressing both Flag-rMrp2 and rNHERF-1 but not from cells transfected with rNHERF-1 or Flag-Mrp2 alone or vector control. IB, immunoblotting; IP, immunoprecipitation.
