structural constituent of ribosome
structural molecule activity
RNA binding
RNA-dependent ATPase activity
ATP-dependent RNA helicase activity
RNA methyltransferase activity
methyltransferase activity
transferase activity, transferring one-carbon groups
RNA helicase activity
S-adenosylmethionine-dependent methyltransferase activity
tRNA methyltransferase activity
nucleotidyltransferase activity
translation initiation factor activity
translation factor activity, nucleic acid binding
translation regulator activity
metal cluster binding
iron-sulfur cluster binding
4 iron, 4 sulfur cluster binding
protein transporter activity
ligase activity, forming aminoacyl-tRNA and related compounds
ligase activity, forming carbon-oxygen bonds

hydrolase activity, acting on acid anhydrides, catalyzing transmembrane movement of substances

UDP-glucosyltransferase activity

glucose transmembrane transporter activity

mannose transmembrane transporter activity

fructose transmembrane transporter activity
