

Circuits related to unknown TF raw data.

Raw circuits obtained with our pipeline, for which we do not have a robust association of
the promoter element to any known Transcription Factor Binding Site. Each line represents a
single circuit.

File is TAB delimited and columns are:
Column 0 is the circuit id, composed by:
- promoter DNA motifs
- Ensembl pre-miRNA id
- miRNA precursor id (pre-miRNA)
- miRNA mature id
Columns 1 contains the Ensembl gene_id of the joint target (jt) genes.

A plain text ASCII version of this file is available at: <http://personalpages.to.infn.it/~cora/circuits/index.html>
