

SUPPLEMENTAL FIGURES

Online Figure 1: Prevalence of dysglycemia (pre-diabetes or diabetes) within each gestational glucose tolerance group at 3-months and 12-months postpartum

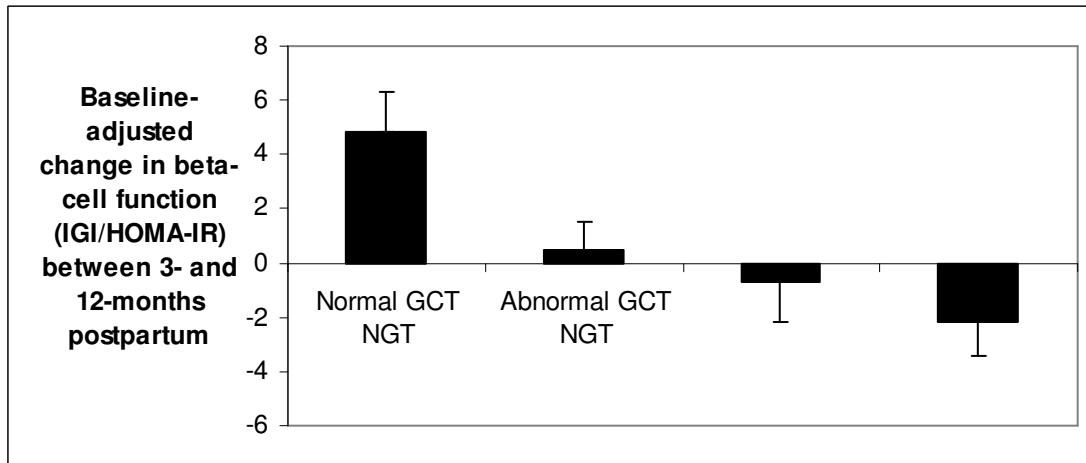

Online Figure 2: Baseline-adjusted changes in insulin sensitivity, measured by 1/HOMA-IR (Panel A), and beta-cell function, measured by insulinogenic index/HOMA-IR (Panel B), between 3- and 12-months postpartum by gestational glucose tolerance group

Panel A: Baseline-adjusted change in insulin sensitivity (1/HOMA-IR)

overall p=0.3928

Panel B: Baseline-adjusted change in beta-cell function (insulinogenic index/HOMA-IR)

overall p=0.0036
