

**Table S2. Stocks containing the *lacO-hsp26-hsp70* reporter transgene**

Insertion stock	Cytological position	Nearest 5' gene	Nearest 3' gene
hsp26-4D5	4D5	13.1 kb	9.1 kb
hsp26-79D	79D	13.5 kb	1.2 kb
hsp26-87C	87C	ND	ND

Distances are calculated from each end of the *lacO* repeat array to the transcription start of the adjacent gene. ND, Within a repeat, so nearest gene distance could not be determined.
