
Total Number of HIV ⁺ subjects recruited into the cohort	1,132
Number of seroconverters (n, %)	515 (45.5%)
<i>DARC</i> genotype data available on:	1,096 (96.8%)
Ethnicity (n, %)	
European Americans (EA)	603 (55.0%)
African Americans (AA)	397 (36.2%)
Others (OT)	96 (8.8%)
Number of HIV ⁺ subjects with WBC count information (total number of WBC count measurements)	
All subjects	1,096 (26,855)
European Americans (EA)	603 (16,302)
African Americans (AA)	397 (8,266)
Others (OT)	96 (2,287)
Maximum length of follow-up (yrs)	15.47
Total follow-up (person years)	7,125.15
Age at cohort inception (mean \pm s.d. yrs)	29.9 \pm 7.2
Proportion of males (n, %)	1026 (93.6%)
Baseline CD4 ⁺ T cell count (mean \pm s.e. cells/ μ l)	605.07 \pm 18.29
Initial (steady-state) viral load (median copies/ml, IQR)	22618, 64500
Number of deaths over follow-up (%)	440 (38.9%)
