

Figure S1.

HCT-116 *p53* (-/-) cells plated on the coverslip were treated with Dox and released as described previously. At indicated time, cells were stained with anti-MPM2/TRITC and hoechst 33342 for immunofluorescence microscope observation.

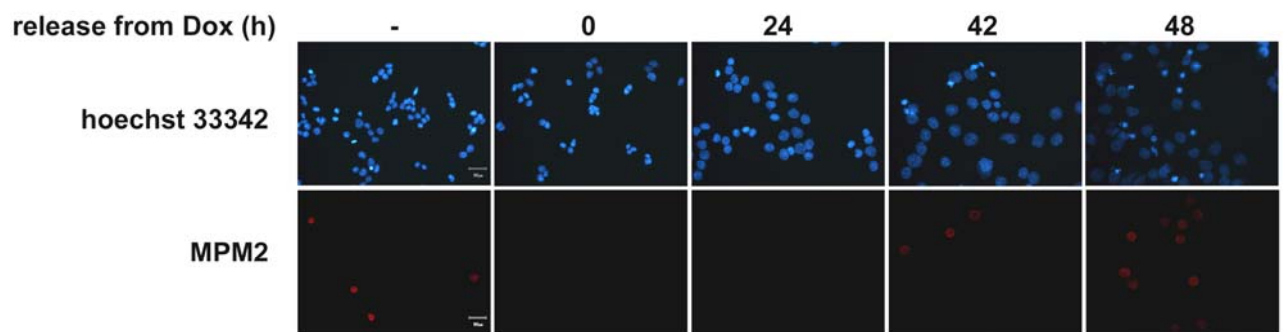

Figure S2.

HCT-116 *p53* (-/-) cells as described above were stained with anti-phospho-Ser10-Histone H3/TRITC, anti- γ -H2AX/FITC antibodies and hoechst 33342 after release from Dox for 48hr.
