

Supplemental Figure 2: Change in HIV-1 Gag CD8+ T cell Response Counts Between Time-Point 1 and 2 for ART and ART+IL-2 group.

Supplemental Figure 2: On the left, in green, we see ART only patients at visit 1 and visit 2 values for HIV-1 Gag specific IFN- γ CD8+ T cell response (counts) which do not change ($p = 0.64$ as shown, Rank Sums Test). On the right, in orange, we see ART+IL-2 patients, visit 1 (pre-IL-2) and visit 2 (post-IL-2) changes in HIV-1 Gag specific IFN- γ CD8+ T cell response (counts) that have decreased after IL-2 treatment ($p = 0.03$ as shown, Rank Sums Test).
