

SUPPLEMENTARY FIG. 7. Colocalization of hASM and HA staining in thalamus and brainstem regions. Similar immunoreactive regions stained for hASM or HA epitope in brainstem-infused regions (A and B: *left*, hASM, 0.817 cm²; *right*, HA, 0.790 cm²) and in thalamus-infused regions (C and D: *left*, hASM, 0.652 cm²; and HA, 0.616 cm²; *right*, hASM, 0.303 cm²; and HA, 0.277 cm²). Scale bars: (A–D) 2 cm.
