

Supplemental Figure 1. Sar1^{D198A}-CFP expression redistributes GalT2 to the ER in CHO-K1 cell. Cells co-expressing Sar1-CFP (a, white) and GalT2 (b, green), and immunostained for the ER marker BiP (c, red); d is the merge of b and c.

Supplemental Figure 2. Sar1^{D198A} does not affect Bet1 localization in CHO-K1 cells. Cells co-expressing Sar1 wt-CFP (a, white) and GalT2 (b, green), and immunostained for the SNARE Bet1 (c, red); d is the merge of b and c.
