

TO REVIEW THE MAP ON PAYAO

ACCESS

Website: <http://sblab.celldesigner.org/Payao10/bin/>

Model names: Kaizu2010_BuddingYeastCellCycle (Figure 1),
Kaizu2010_BuddingYeastCellCycle_regulatory (Figure 3a)

The models have been assigned as “public” enabling the community to view and comment on tags without a username/password.

The default user account **payaouser** would enable users to add tags to the models.

Community users interested in customizing their own accounts and access the maps from their accounts, are requested to email payaoinfo@sbi.jp for registration.

Zoom in/out

Bird's Eye View

The screenshot displays the Payao beta web interface. On the left, a sidebar titled "Search Tags" contains a section for "sbi's Tag Sets" with checkboxes for "Notes", "MIRIAM", and "AnnotationLayer", each with a "readable" status. Below this are options for "Show Disabled Tags" and "Show Update Tags", along with a "monthly" dropdown and a "view statistics" button. The main area shows a biological map titled "Kaizu2010_BuddingYeastCellCycle". A central information box for "Note_sa840" provides details: "Created by: Information 2010-07-20", "Last updated: 2010-07-20", "KeyWords:", "PubMedID: 17267692", "OutLink:", "FreeText: YJL194W PMID: 17267692", and "Comment: 0". The map itself consists of various nodes (circles and rectangles) connected by lines, representing a complex biological pathway. A "Bird's Eye View" window is open on the right, showing a zoomed-in view of a specific section of the map. A red square box on the map indicates the area being viewed in the Bird's Eye View window. A red arrow points from the "Bird's Eye View" text above to the window. Another red arrow points from the "Zoom in/out" text to a magnifying glass icon in the toolbar. A third red arrow points from the "Display on/off TagSets" text to the "Add TagSet" button in the sidebar.

Drag the red square box
