

**Table S3. ANOVA tables from analyses of larval performance on mature *Ctor*.** We monitored hybrid larvae placed on blooming to post-blooming *Ctor* plants for 10 days. We analyzed the effect of the larval type (CC vs. CP vs. PC vs. PP) on log transformed weight (A) and arcsin transformed survival (B). See Figure 3C for visual presentation of data.

**A) Effects on log transformed weight**

Effect	df	SS	MS	F	<i>P</i>
Larval Type	3	7.7878	2.5959	17.4406	<0.0001
Error	75	11.1633	0.1488		

**B) Effects on arcsin transformed survival**

Effect	df	SS	MS	F	<i>P</i>
Larval Type	3	0.1927	0.0642	0.4192	0.7397
Error	78	11.9508	0.1532
