

Supplementary Figure S3. Distribution of CBX7-EGFP and CBX7-SUV39H2 complexes in human gastric carcinoma cell line MGC803. At 36 hours after transfection, images of pEFGP-C1-*Cbx7* (green) and Hoechst (blue) fluorescence were obtained with a confocal microscope and merged (top). The confocal images of CBX7-SUV39H2 complexes observed in bimolecular fluorescence complementation (BiFC) assay (yellow) and Hoechst (blue) fluorescence were obtained and merged (bottom).
