

Supplementary analysis. Prevalence, exploratory factor analysis, and 2-parameter item response theory analysis estimates for 1) existing DSM-IV criteria defined on a lifetime basis and 2) the addition of craving defined on a lifetime basis, among lifetime drinkers in the general population (N=27,616)

	%	Model 1: existing DSM-IV criteria (lifetime)					Model 2: existing DSM-IV criteria plus <i>Craving</i> (lifetime)
